Reinforced support feet offer secure mounting.

### Adaptable

Threaded conduit hubs permit connection to nonmetallic and metallic raceways.

### Watertight Seal

Temperature and weather-resistant silicone gaskets protect fixture from moisture penetration.

### Long Life

Sceptalight nonmetallic fixtures provide long life and easy servicing—unlike metal fixtures and guards that can corrode and seize together.

### UV-Resistant

The UV-resistant material makes Sceptalight fixtures suitable for outdoor use.

### Corrosion Resistant

Thermoplastic construction resists attack from acids, alcohols, alkalis, organic solvents, detergents/ cleaners, greases and oils as well as many other types of chemicals.

Withstands exposure to direct sunlight, heat, salt water and extreme weather.

### Durable, Impact Resistant

High-impact nonmetallic guard resists physical impact, chemical attack and heat-induced deformation.

# SCEPTALIGHT LED

Introducing three Sceptalight LED products: the LED Retrofit Light Engine, the Heavy-Duty LED Light Fixture and the Utility LED Light Fixture. Sceptalight LEDs offer significant energy savings, up to 85% compared to incandescent, and up to 34% compared to fluorescents. Moreover, Sceptalight LEDs can last beyond 50,000 hours without a single need for maintenance.

Constructed of very strong and durable materials, the polycarbonate globe is impact resistant and is resistant to UV light degradation. The specially designed aluminum heat sink dissipates the heat generated by the LEDs to the exterior environment ensuring long-life and optimal performance in both hot and cold environments. Sceptalight LEDs have been tested and certified for use in indoor, outdoor, wet location, wash down and corrosive and hazardous\* environments. They are certified to the latest LED light fixture standards and NEMA 4X approved.
