ELECTRICAL BOXES FOR ICF BUILDINGS

• Single, Double and Triple Gang
• Commercial (AC or NMD Cable) and Residential (NMD Cable) Applications

We build tough products for tough environments®
THE ELECTRICAL BOX DESIGNED SPECIFICALLY FOR ICF CONSTRUCTION

THE SAME OLD PROBLEM

Until now there have been few choices when attempting to provide a truly professional electrical box solution for Insulated Concrete Form buildings. Traditional electrical boxes are tedious to install and often require a fair amount of ingenuity and additional labor to provide a less than ideal finished product. Other boxes offered to ICF builders require installation before the concrete pour, throwing off your project time-line.

AN INNOVATIVE SOLUTION

INEXO’s patented design provides a truly professional solution that works with your production schedule and provides the quality installation and finished look that builders require and owners appreciate. INEXO boxes link seamlessly with existing ICF materials, tools and methods. A complete offering designed for ICF walls allow builders to standardize on the use of electrical boxes throughout the building.

✓ INEXO electrical boxes are installed after the concrete pour allowing you to follow your traditional production schedule.

✓ INEXO boxes can be installed anywhere on the ICF wall allowing for more variety in box positioning as installers are no longer required to affix to the ICF ties or drill and secure to the concrete wall.

✓ INEXO ICF boxes are available in single, double and triple gang options for use in residential and commercial applications.

✓ INEXO boxes are fully certified to CSA standards for use in ICF and can resist pull forces exceeding 100 lbs – (twice the standard requirement)

1 Patent No. 6,932,628 & Patent Pending

FAST AND EASY INSTALLATION

Installing INEXO boxes requires no special training making the transition to a new solution seamless.

STEP 1: Select the position for your box. Using a hot-knife or cutting tool, cut the opening in the EPS foam.

STEP 2: Insert the INEXO box into your opening and push the ‘teeth’ into place until you hear the ‘click’ – so you know your box is secure. If you are positioned next to a tie, you can utilize two of the ‘teeth’ on the non-tie side and use the flange holes on the opposite side to screw into the plastic tie.

STEP 3: Pull through your NMD cable and continue
INNOVATIVE DESIGN
FOR A PROFESSIONAL INSTALLATION

Residential box designed for NMD cable (14/2 – 10/3).

TEETH can be easily removed and replaced and provide an audible ‘click’ when fully engaged and secured to the EPS foam.

Laser level guides for the most precise box placement.

‘TEETH’ lock in place for a rigid hold that won’t loosen.

Full flange prevents box from twisting and sinking into foam if over-tightened. This innovation allows installers to provide a professional straight finish with no lop-sided boxes.

Greater installation versatility with 3 screw hole choices and flanges on both sides.

Single gang box provides 19 cubic inch capacity.

INEXO provides a 1/2” drywall setback resulting in a professional finish.

With an insertion depth of 2-1/4” and a smooth back, the INEXO box is designed specifically for ICF.

Commercial box designed for armoured cable (AC) or NMD cable.

The new INEXO ICF box divider provides contractors with a quick and convenient way to separate different voltage sources in the same box.

Residential (NMD Cable 14/2 – 10/3)

About the IPEX group of companies

As leading suppliers of thermoplastic piping systems, the IPEX Group of Companies provides our customers with some of the largest and most comprehensive product lines. All IPEX products are backed by more than 50 years of experience. With state-of-the-art manufacturing facilities and distribution centers across North America, we have earned a reputation for product innovation, quality, end-user focus and performance.

Markets served by IPEX group products are:

- Electrical systems
- Telecommunications and utility piping systems
- Industrial process piping systems
- Municipal pressure and gravity piping systems
- Plumbing and mechanical piping systems
- Electrofusion systems for gas and water
- Industrial, plumbing and electrical cements
- Irrigation systems
- PVC, CPVC, PP, PVDF, PE, ABS, and PEX pipe and fittings

Product is manufactured by IPEX Electrical Inc.
