

Duraplus™ Industrial SXE True Union Ball Check Valve

The IPEX SXE EasyFit True Union Ball Check Valve is manufactured using a ductile industrial grade gray ABS to ensure durability, strength and safety, with a pressure rating of 232psi at 23°C / 73°F. The valve is available from 1/2" to 2" with true union socket ends and EPDM seals.

The ABS SXE has all the same innovative features as the PVC and CPVC versions. This valve features an ultra-compact double block true union design allowing the valve to be easily removed from the piping system and fully serviced. A main seal safe blocked carrier provides improved seal integrity under tough service conditions while the optional EasyFit multifunction handle doubles as a tool for carrier adjustment, and for tightening union nuts precisely.

Size (inches)	Item Code
1/2	337501
3/4	337502
1	337503
1-1/4	337504
1-1/2	337505
2	337506
