

## Duraflo® WeatherPRO® Series PRO75 Roof Vent

WeatherPRO® Technology was designed with the harsh North American climates in mind, allowing high airflow while providing excellent defense against weather infiltration. With no moving parts, the unique baffle system effectively deflects rain and snow, allowing water to drain harmlessly out of the drainage openings. Install the Duraflo® WeatherPRO Series PRO75 on a sloped, shingled roof to ventilate hot, moist attic air as a part of a balanced ventilation system. Installed within 24 inches of the roof's peak.

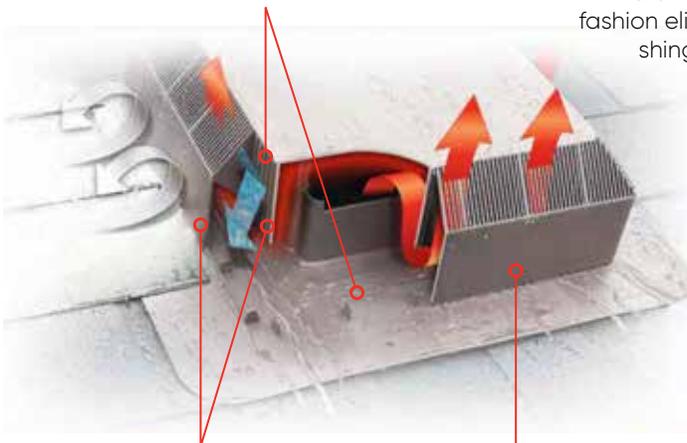

PRO50 21.81" x 21.81" x 5.51" (4/carton)

Color	Part Number
Black	60PRO75BL
Brown	60PRO75BR
Gray	60PRO75G
Weatherwood	60PRO75WW

Moisture Control System directs and deflects precipitation away from vent openings

Warm moist air exits in a chimney like fashion eliminating shingle stains

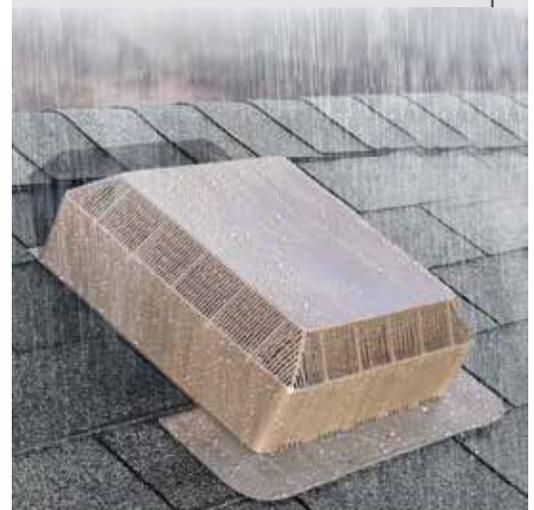

Unique baffle system wards off wind driven snow and rain

Drainage openings allow for water to escape

### Features & Benefits:

- Unique, patented, weather infiltration protection internal baffle system
- Indicator lines for easy installation
- Made from durable, UV resistant polypropylene to resist denting, crushing and corrosion
- Cold impact resistant down to  $-40^{\circ}$
- Net free venting area of 75 sq. in.
- Four PRO75's will ventilate 1000 sq. ft. of attic space (approx)
- Roof pitch range 2/12 – 12/12
- Top venting channels moist air away from roof eliminating shingle staining
- Vent cap design with built in weeping holes eliminates bird nesting and water pooling
- Extends the life of roof shingles

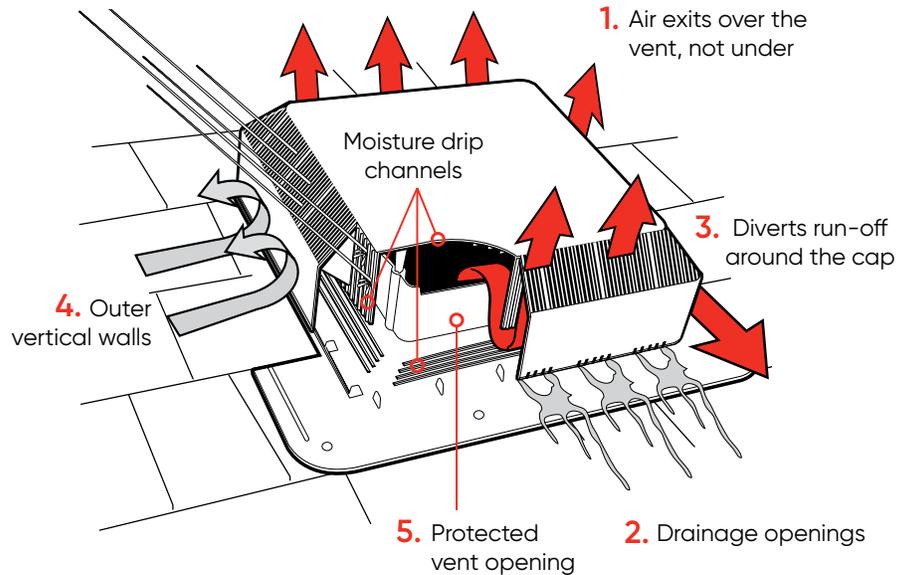

### Standards:

CDN. Patent 2,766,888

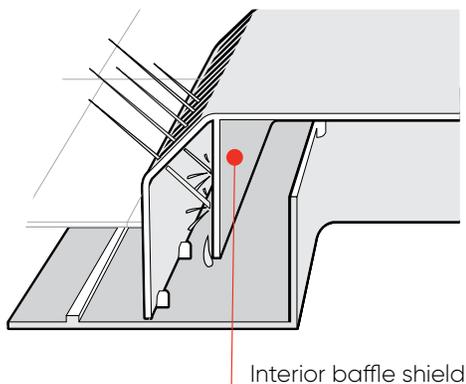

## Description

1. Unique baffle system wards off driving snow and blistering rain while allowing warm moist air to exit in a chimney like fashion eliminating shingle stains.
2. Drainage openings allow for water to escape.
3. Design diverts water around vent cap.
4. The flat exterior wall acts as the first line of weather defense by deflecting driving wind over the cap and not under it like many traditional vents do.
5. The throat opening is positioned deep into the vent behind the weather protecting baffles. Also under the cap are moisture drip channels that collect fine water mist and direct it away from the opening.

## Weather Protection

WeatherPRO's patented internal baffles deflect water and snow, allowing it to drain harmlessly out the drainage openings. Designed to allow high airflow while providing excellent defense against weather infiltration.
