**IPEX Launches New Distribution Center in San Bernardino, California to Expand Reach in Western U.S.**

**San Bernardino, California, October 30, 2025** – IPEX is proud to announce the official opening of its new 192,000 sq. ft. distribution centre in San Bernardino, California. This facility represents a significant milestone in the company's ongoing commitment to strengthening its North American supply chain, with nearly $35 million invested to expand capacity, drive operational efficiency, and enhance customer service.

Strategically located in the heart of Southern California, the new distribution centre significantly enhances IPEX's West Coast footprint. It complements the company's supply chain network, enabling broader regional coverage and faster delivery times for customers across the western U.S.

Designed to support both current and emerging business needs, the facility combines a traditional warehouse with a dedicated pipe yard. This integrated approach enables IPEX to move a broader mix of products with greater efficiency and streamlining operations. The facility is purpose-built to better serve customers and unlock new market opportunities across the region.

"Our customers have always been our top priority," said Travis Lutes, President and Chief Operating Officer at IPEX. This new facility brings together the scale, efficiency, and adaptability needed to expand our product offering and continue delivering the reliable service they depend on."
